

Shawn Skaggs

The official meeting was closed and we went around the room in the Round Robin -

Alice Talnack introduced herself. She's flying out of Ocean Air at WVI, and is transitioning from her Mooney to Light Sport, and enjoying it.

John Feemster let us know that George Watson is pulling out on the Rans project. George Nicholson is helping out with completing it. The aircraft is nearly complete, needing only a cowling at this point.

Phyllis Feemster is the behind-the-scenes supporter of the Rans project.

Yeayyy Phyllis!

Stephen Mann has moved his Jabiru to RHV.

Steven Winegarden is building his new hangar at Frazier Lake, with amazing spiral-reinforced pier caps on top of pilings. He showed us isometric views!

Steven also recently visited Kill Devil Hill and rode with the Wright Brothers.

His kids can fly his r/c helicopter better than he can; and they all took a chopper ride in Hawaii into the canyon where Jurassic Park was filmed. They made it out alive!

Frank Ducker is now a master of the Bing carburetor, and he's fashioned an in-flight adjustable elevator trim tab for his Kolb. He did 8 touch-and-goes yesterday, and had a blast!

This issue was cobbled-together by Vaughn McIlrath!
